

Am. J. Hum. Genet. 64:334–334, 1999

Erratum

There was an error in the article “Genome Screens Using Linkage Disequilibrium Tests: Optimal Marker Characteristics and Feasibility,” by Chapman and Wijsman, which appeared in the December 1998 issue of the *Journal* (63:1872–1885). The equation for $G^2(t)$, which appears immediately below the subheading “Optimal Allele Frequency Configuration” on page 1875, should read as follows:

$$G^2(t) = c + \frac{c}{ma - 1} \sum_{i=1}^m \frac{s_i - a^2}{a + s_i}.$$

The constant multiplier of the summation term was omitted in the preparation of the manuscript. This error has no effect on the results.
